

STOPFREEZE

PIPE FROST PROTECTION KIT

BOILER CONDENSATE DISCHARGE LINE

Self regulating heating system for safety and low running cost

Safe for plastic or metal pipes

Fits on the pipe in a straight run, no need to spiral

Protects boiler condensate discharge lines up to 32mm, assuming a minimum 13mm thickness of weatherproof thermal insulation is applied overall to the pipe after fixing the trace heating

Conforms to the 17th Edition Wiring Regulations & IEC 62395 - the Standard for Electrical Resistance Trace Heating Systems for Industrial and Commercial applications

CONTENTS OF STOPFREEZE KIT

In-line RCD (Residual Current Device) 10amp

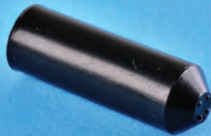

Ready made Self Regulating Heating Cable with In-Line Thermostat. Thermostat has indicator lights & switches at 5°C for minimum energy cost

In-line Junction box with cable retention clamps to EN-60598-1 & BS4533 for increased safety

Plastic cable ties to fix trace heating cable & junction box to pipe

Spare end cap
